

Method - Overfitted Shape Edit

Goal: we want to localize the edit.

1 - only allow f^x and f^o to learn

Method - Overfitted Shape Edit

Goal: we want to localize the edit.

1 - only allow f^x and f^o to learn

2 - only q_i^S closest to x is updated

$$\rightarrow \hat{w}_i^S(x) = \mathbb{I}_{\{i\}}(\operatorname{argmin}_i d_i(x, C_i))$$
